

Secrets of the Solar System

How do Earth and the moon move in relation to the sun and the other planets?

How do artists decide which medium is the most effective for a picture?

How can we use music to create mood?

Why is there day and night?

How does the artist Peter Thorpe depict space?

How does light travel?

How are shadows formed?

Why are they the same shape as the objects that created them?

Project outcome:
Space art gallery
shadow puppet show

Secrets of the Solar System

Year 5 Autumn 1

axis	planet
dynamics	rhythm
gravity	rotate
melody	shadow
movement	solar system
orbit	spherical
pitch	straight
